Fifa 22 Features Key:

- Rare Traditions - Rebuilt with 24 years of FIFA game evolution, and designed with replayability in mind, Rare Traditions in FIFA 22 brings back, and improves upon, the fan-favorites from FIFA 17 and FIFA 19. Rare Traditions will be the last major update to FIFA Classic before the release of FIFA Ultimate Team, and could also be the last update to EA SPORTS FIFA as it enters into a new era.
- Lifestyle - The Origin team took inspiration from fan feedback to make some tweaks to how players relate to their game and their clubs in FIFA 22. You can now develop and grow your players' on-pitch and lifestyle attributes, like Speed, Strength and Intelligence.
- Enhanced Training - Complete more training drills and connect more to your club. Train faster, more efficiently, and better.
- Capture Control - Additional options allow you to change the ways you can snap to long passes, balls in the air, close attention, speed and heading.
- Hoverboard Back-Goalkeeper Animation - Increased speed and fluidity in goalkeepers as they attempt to react to shots, allowing players to return and close down the ball more aggressively.
- New Movements - Add more dribbling options for attacking players, different types of tackles and new aerial moves.
- Shot Trajectories - An adaptive system that lets your players' shots bend less towards goal as they shoot from outside the penalty area, creating more dynamic finishing opportunities.
- New Targeting Animation - Your players will also move more gracefully if you fire the ball at them.

-
- New Off-the-Ball Movement – All movements off the ball can be controlled by the player's new Profile Attributes.
 - Longer Pass Attacking Cutbacks – More subtle cuts from 18-24 yards for attacking players to improve accuracy and consistency in cutting in-behind defenders.
 - AI Off-Ball Intelligence – The AI takes your opponents' runs, movements and positioning into account, and try to close down lines of vision - preventing a teammate from being able to find them, making it harder for the AI to simply stay in their pockets.
 - Goalkeepers' Drop Off - More accurate and responsive drop offs from the goal line and more timing support from the goalkeeper for your players
